Subscribe to the private podcast feed

Manage Your Account · https://the-haven.co/docs/access-the-members-private-podcast-feed/

As part of your membership you have access to The Haven Private Podcast Feed. This sends audio updates to your chosen podcast player. The feed is simple to set up and you should be able to add the feed to:

Table of contents

- Instructions For Setting Up Your Personal Feed
  - Apple Podcasts
  - Pocket Casts
  - Overcast
  - Castbox
  - Breaker
  - Podcast Addict
  - Downcast
  - Google Podcasts

Sometimes these platforms change and while I endeavour to keep the instructions up to date, please do get in touch if you run into any trouble.

Instructions For Setting Up Your Personal Feed

Your unique private feed is:

https://the-haven.co/feed/

This feed is unique to you and as long as you are a member you can use it to access the private feed. No one else can see it on this page (including me), so **you need to make a little tweak to turn it**

into a podcast feed...

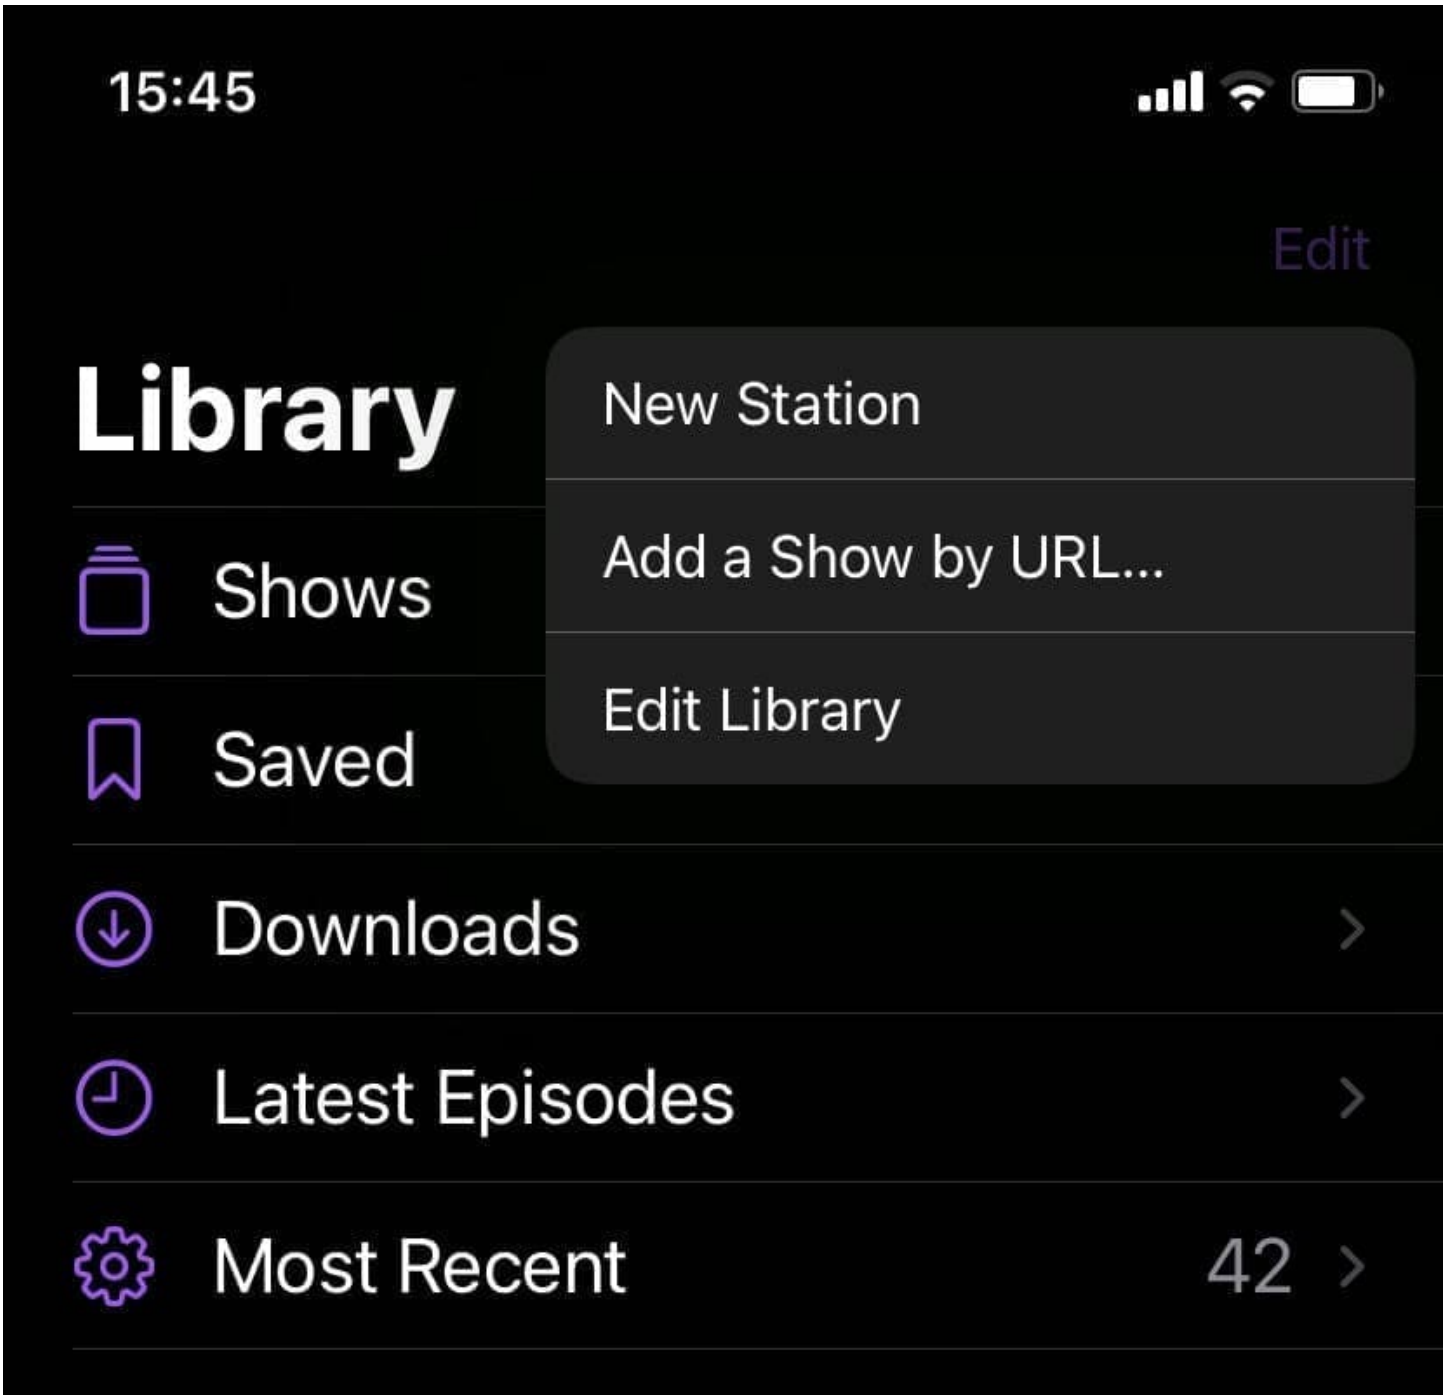

(**NOTE**: to get your private podcast feed you will need to add ***/private-podcast/*** after /feed/)

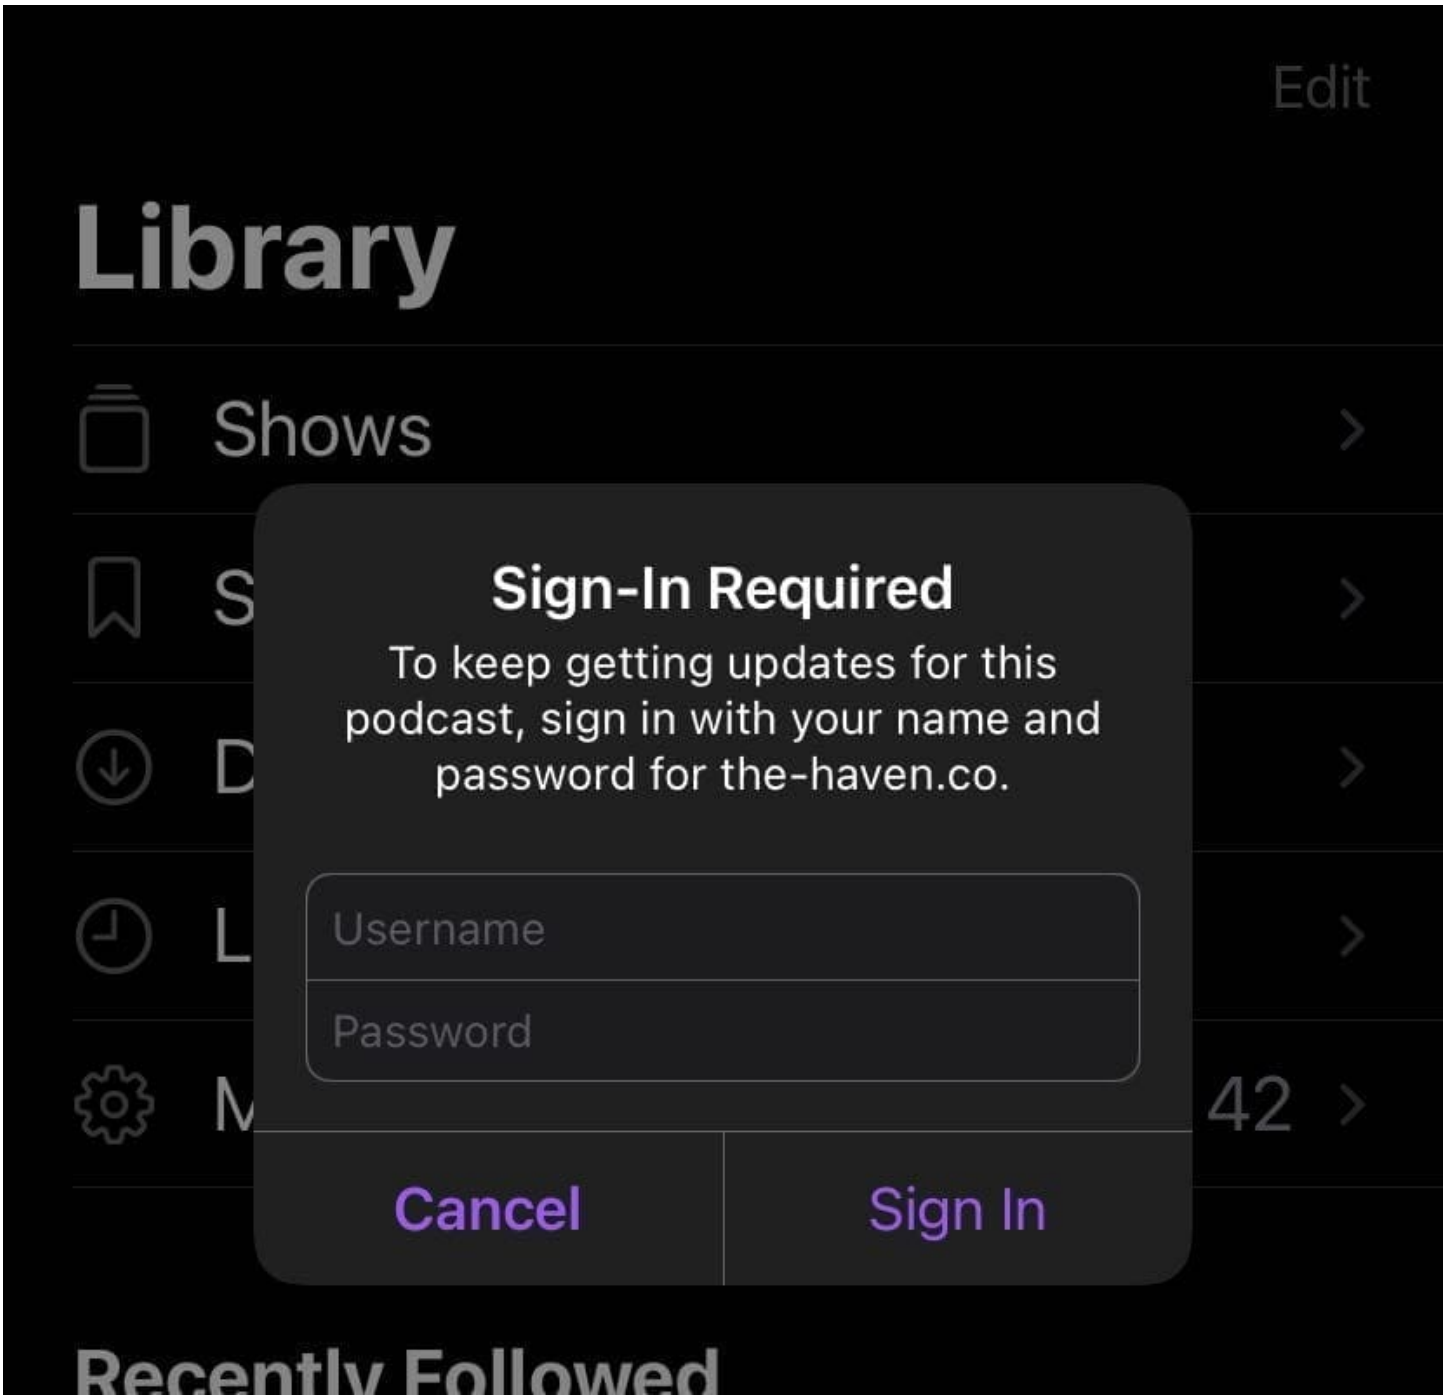

It should look SIMILAR TO (but not exactly the same as) this: "*https://the-haven.co/feed/**private-podcast**/?wpmfeedkey=7;5aef4334976210591b35qm744289bleb6*"

Copy your private podcast link and paste it where you listen to podcasts. You will need to use your Haven login details to access it.

Apple Podcasts

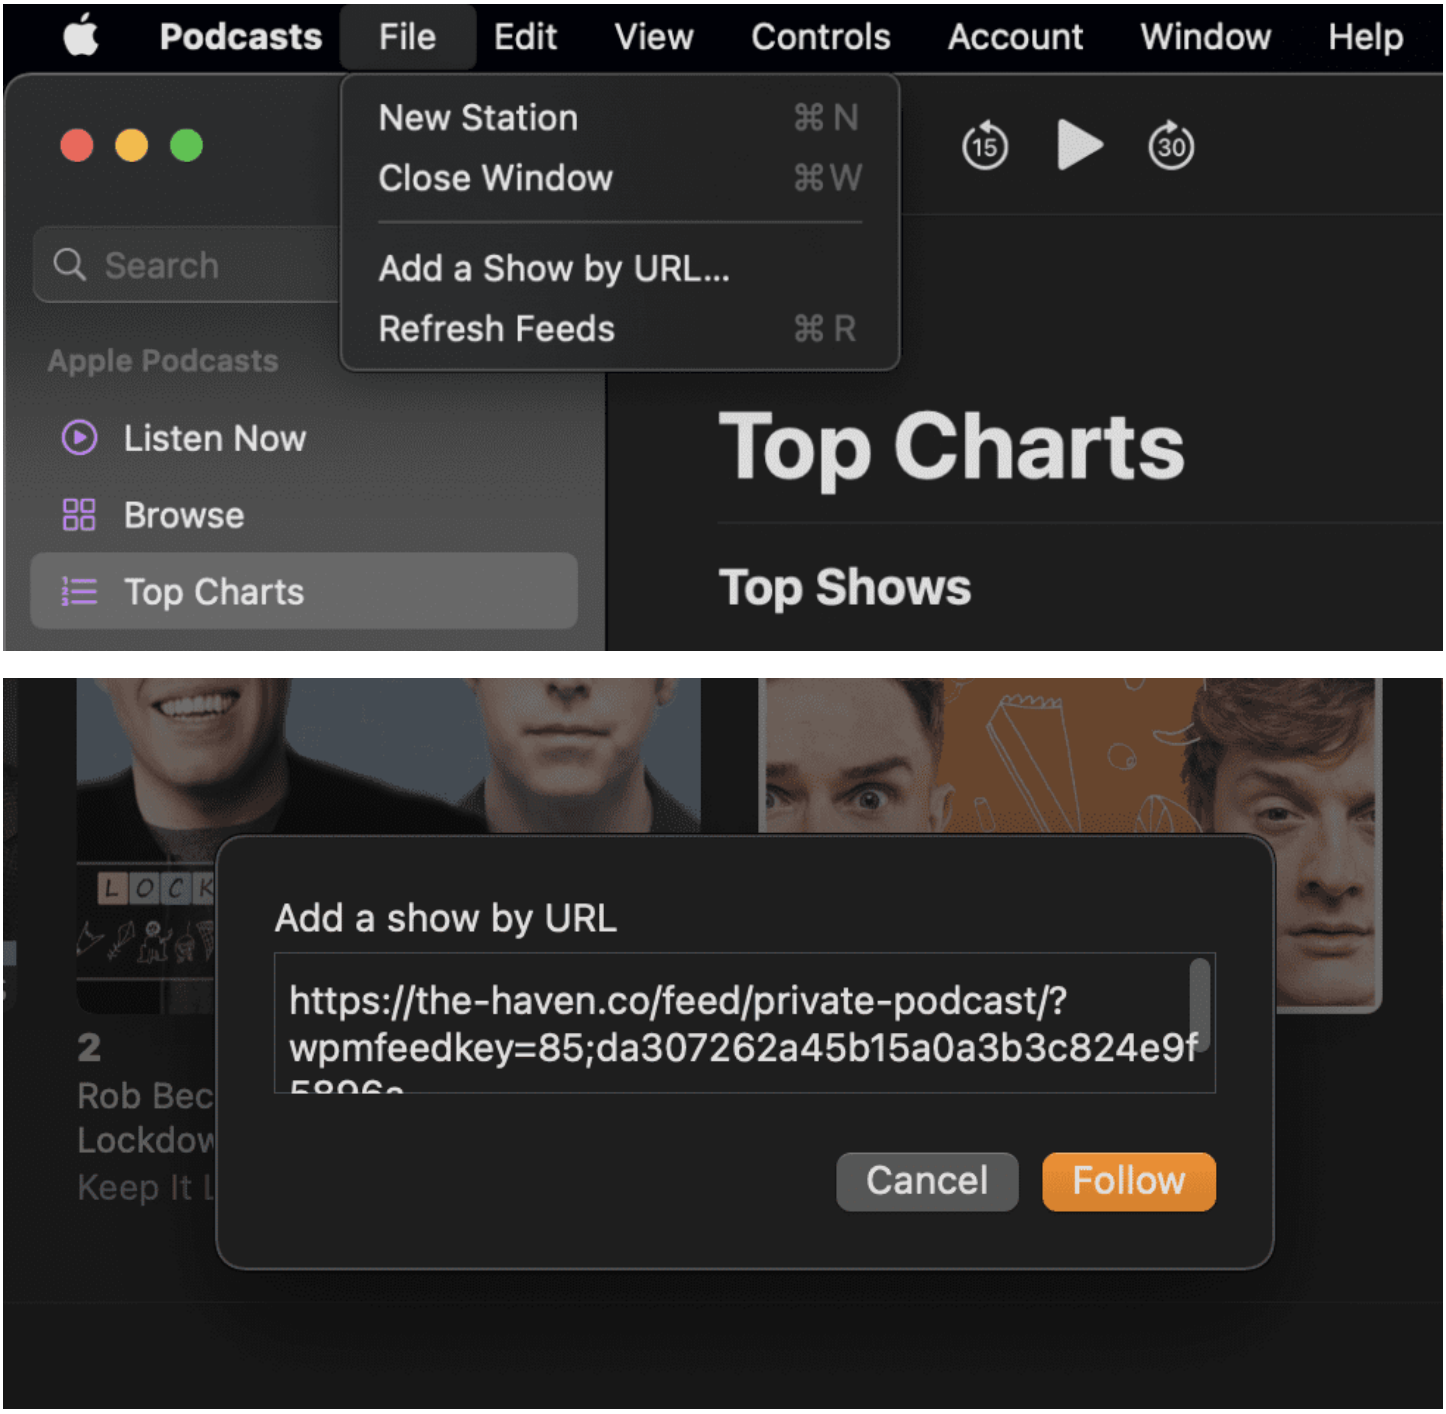

On the mobile OS app you will find the link to 'Add a Show by URL...' under the Edit button on the Library tab.

15:45

On the Mac desktop you will find this option under 'File' on the top menu. Add the link, and then you'll be asked for your Haven username and password.

Once you add them you should have full access to the feed.

Pocket Casts

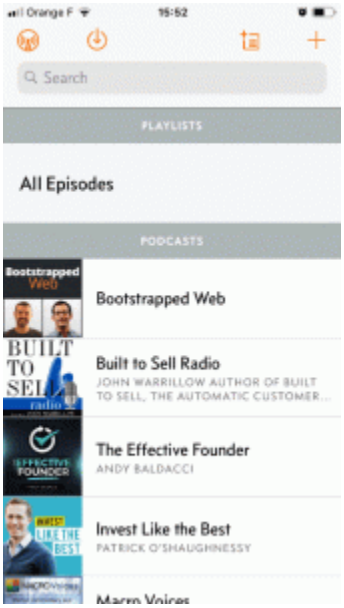

- You need to create a new url using your Haven credentials. It will look like this: ***https://username:password@theUrlOfTheFeedWithoutTheHttpBit***
- For example (you need to change the bits in red):

https://YourHavenUsername:YourHavenPassword@the-haven.co/feed/private-podcast/?wpmfeedkey=7;85;da307262a45b15a0a3b3c824e9f5896a

- Then add that link to this page: https://www.pocketcasts.com/submit/ (select 'private') - this will give you a new url that looks something like: ***https://pca.st/private/5c76df90-e359-0829-a839-0ped82734db9***
- You can then add that to the Pocket Casts app and it should work!

Overcast

1. Copy the RSS feed URL
2. Tap the “**+**” icon to add a podcast
3. Select **Add URL**
4. Paste the URL and click **Done**

Castbox

1. Copy the RSS feed URL
