# Manage your photos

Manage Your Profile · https://the-haven.co/docs/manage-photos/

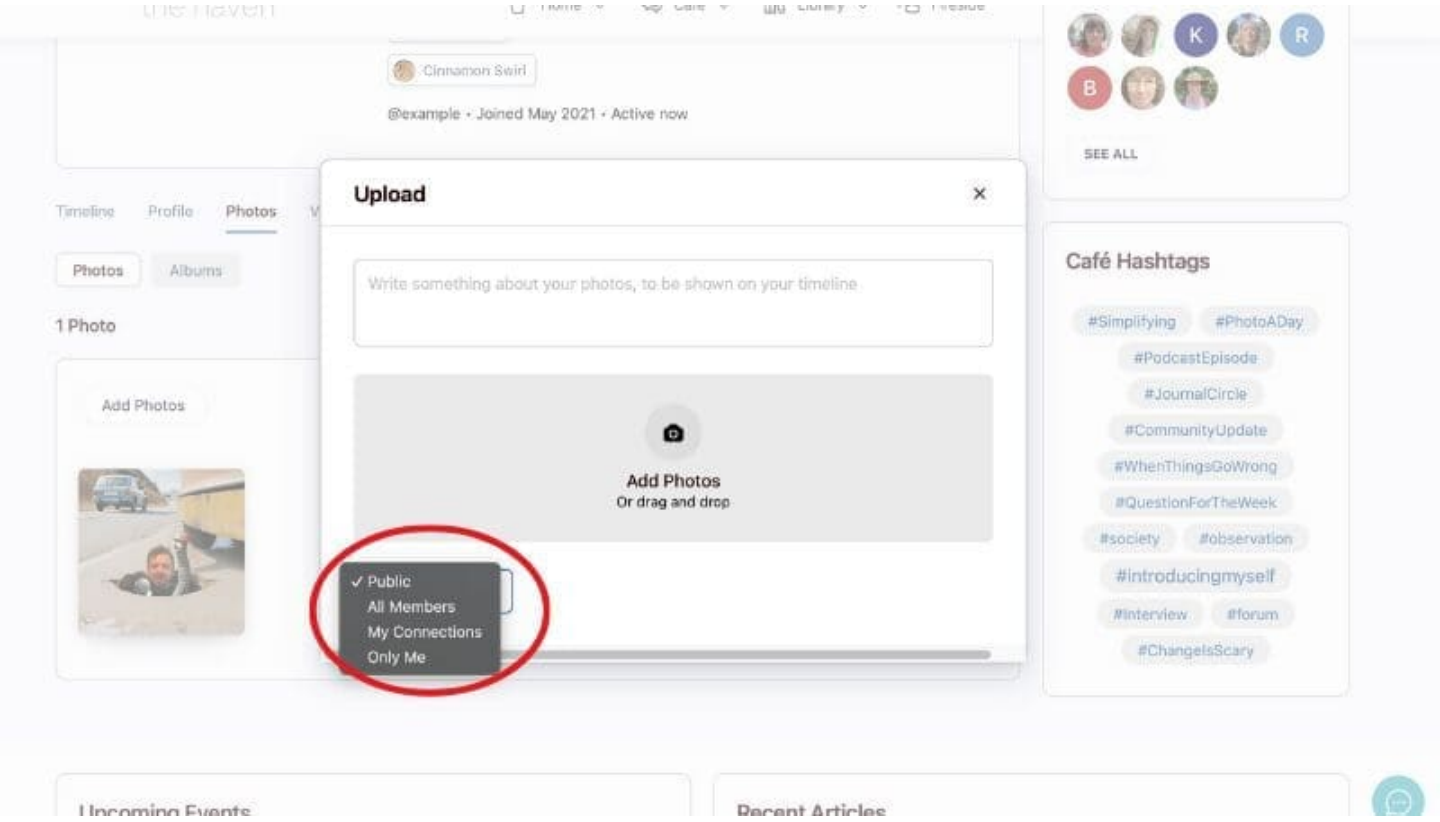

You can upload and manage images in the member profile area of your Haven subscription. All images you upload through the Activity Feed will appear in the "Photos" tab of your profile.

You can also add photos directly to your account by clicking "Add Photos".

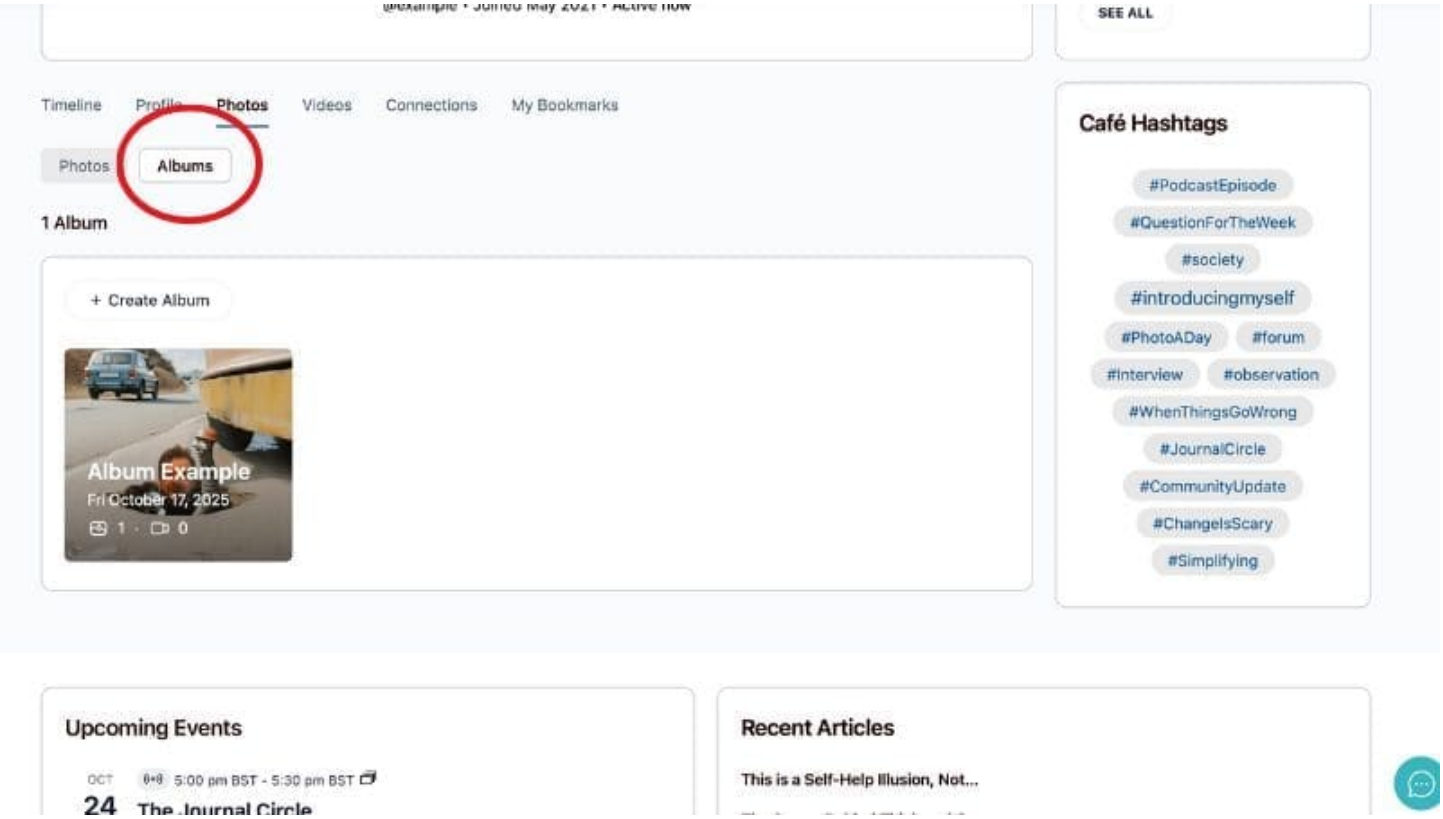

You can choose whether to make your images public for all members to see (Public and All Members mean the same), just your connections, or only you.

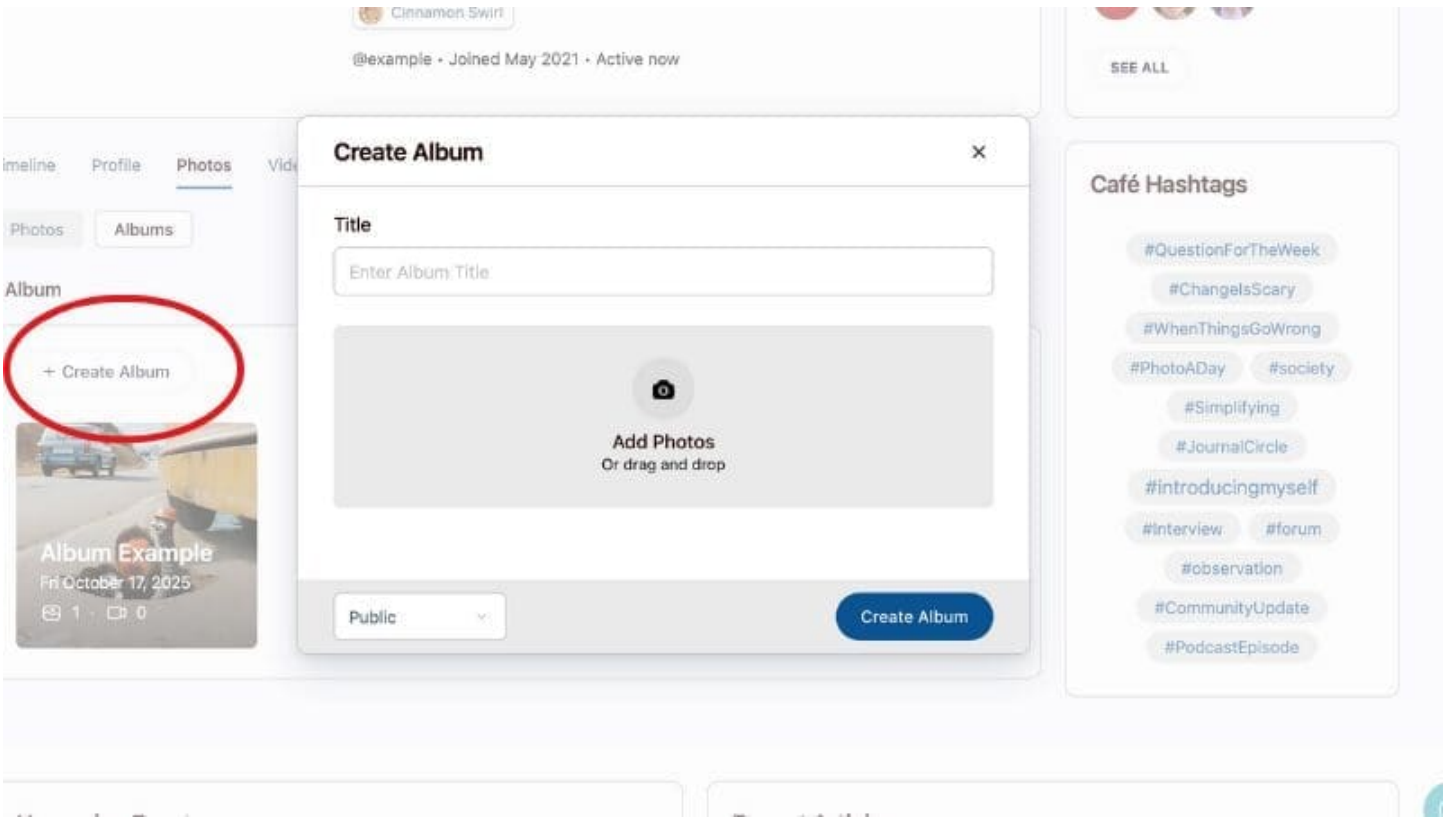

# Albums

You can organise existing photos into Albums and create albums with new uploads.

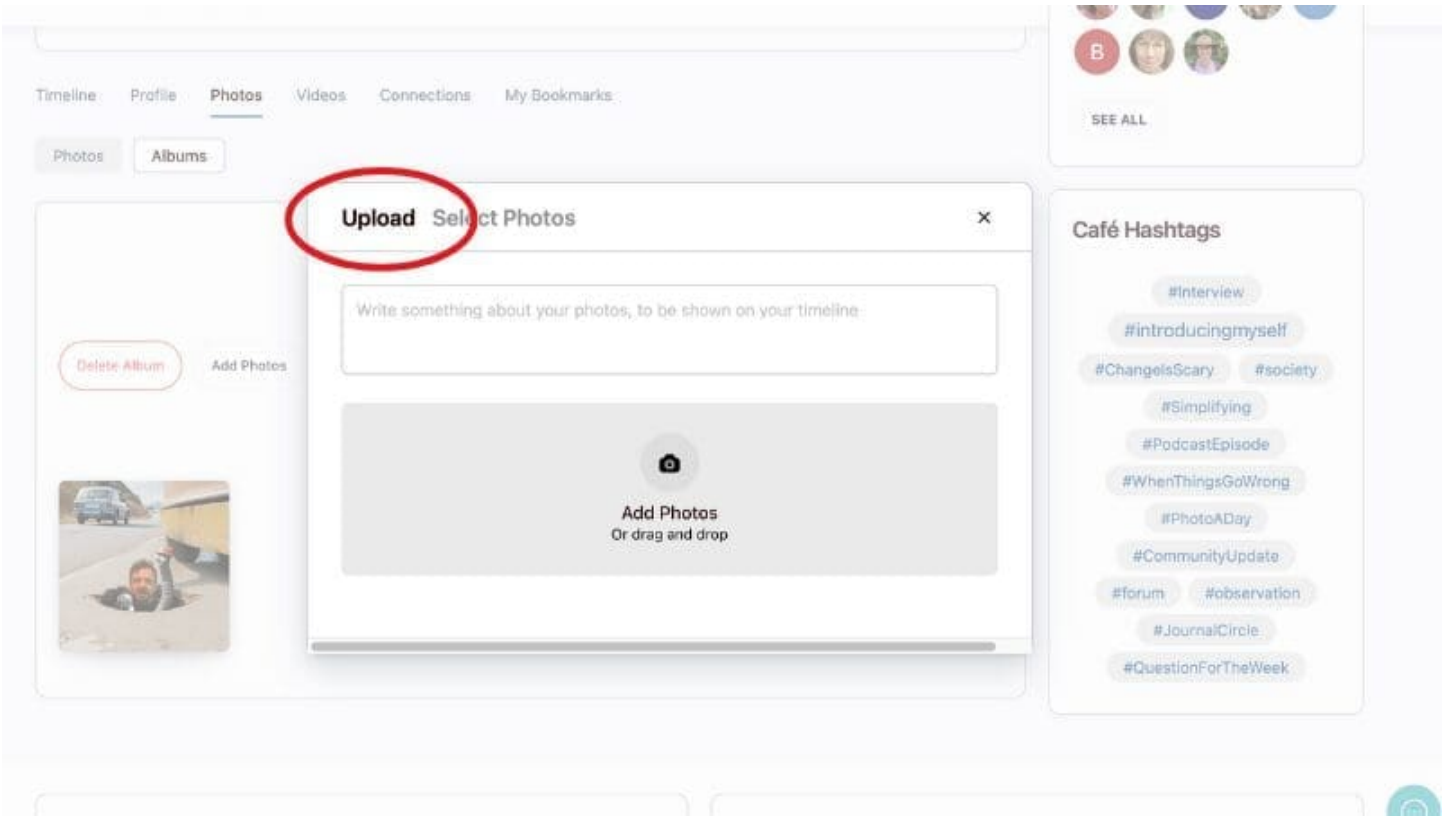

You will find the Albums tab under the Photos tab on the profile.

To create a new album, click Create Album and it will bring up a box where you can add a title and set the privacy level. You don't need to add photos at this stage. If you want to organise existing photos into albums, add your title and click "Create Album".

Open the album by clicking on it and then click "Add Photos". You will see this pop-up box, which gives you the option to Upload or Select Photos.

Click on Select Photos to see all your previously uploaded images. You can click on the ones you want to add to the album.
